- Plug-and-play, easy installation
- Install as a self-help / training kiosk
- Use to provide self-service information
- All Rose Electronics products come with a 30 Day Money Back Guarantee and free Technical Support

The XtendVue™ Advantage . . .

The XtendVue extension display is the ideal solution when your display needs to be extended away from the computer.

The XtendVue can be located up to 1,000 feet away from the computer using industry standard CAT5 cable and a Rose KVM Extender transmitter. This allows control of the display but keeps your computer safe and secure in a remote location.

Several Rose Electronics KVM extender transmitters can be used, depending on your specific application.

Adding the local keyboard and mouse option gives the user access to the controlling computer.
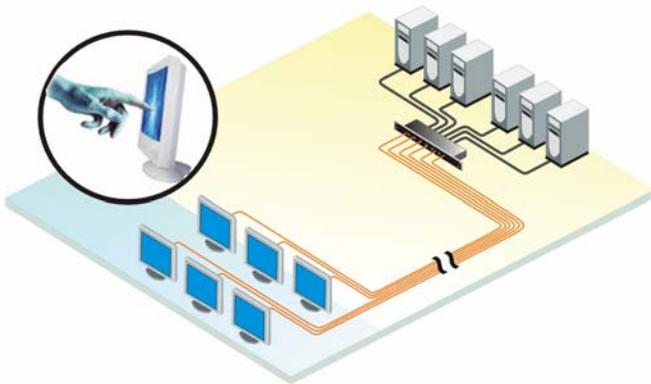

The optional Touchscreen capability can provide information to employees or customers. Interactive requests can provide help in locating in-store products, inventory availability, and much more.

An interactive kiosk is a computer based device which allows customers to seek products and service information without the need of staff interaction. The XtendVue is the perfect solution for kiosk applications.

Typical Application

Locate your computer up to 1,000 feet away using standard CAT5 cable

Introduction   The XtendVue panel mount and LCD flat panel displays excel in their image quality, rugged design, and versatility. The XtendVue allows you to locate your computer up to 1,000 feet away from the display unit in a safe and secure location. The computer video and optional keyboard, mouse, and stereo audio features are transmitted over the same CAT5 cable. The modular design of the XtendVue offers a variety of mounting options.

Models   The XtendVue LCD flat panel display is available in the following models:

- 15" / 17" interactive model with Touchscreen and optional keyboard, mouse, serial, and stereo audio
- 17" Panel mount with Touchscreen and optional keyboard, mouse, serial, and stereo audio

XtendVue has many different applications that can enhance your business presence and provide useful and interactive information for your employees, visitors, and customers. Some of the useful applications are:

Office buildings   The XtendVue can be used as a detailed building directory, showing the tenants and their business information.

Company Directory   Provide employees an easy way to find information about their benefits, request vacations, and more!

Retail stores   Display the in store directory, catalog, and specialty items not normally stocked.

Health Care   Provide patients information about health topics, doctor directory by specialty, and visitor information

Virtual Receptionist   Install the XtendVue in your business lobby to provide visitors and vendors information about your company, employment, goals, and more.
